

Test Drive

Sydney's Electric Car future

Monday, 25 July 2011

"When I was in Copenhagen I committed to working with the NSW Government, car share companies and others to scale up the purchase of electric vehicles."

Clover Moore, Lord Mayor Sydney

Sydney City is accelerating its support for electric vehicle infrastructure.

Come along, **test drive the i-MiEV**, hear and debate Sydney's future.

Sydney City is joining international cities including San Francisco, Amsterdam, Houston, Detroit, Vancouver and London and installing charging infrastructure for electric vehicles and car share schemes.

The City of Sydney is currently test driving the Mitsubishi i-MiEV, the first production electric vehicle on the Australian market.

Hear diverse perspectives from the City of Sydney, ChargePoint, and the University of Technology. The electric car market and infrastructure over the next 10 years will be different to what we have been used to.

Speakers

Chris Binns: Manager Strategy & Assets, City of Sydney

An update on electric vehicle tests by Sydney City Council and infrastructure plans for the future.

Chris Dunstan, Research Director, Institute for Sustainable Futures, UTS
Research on EVs, alternatives, and the implications for companies, organisations and urban planners.

Lance Douglas, Chief Technology Officer, ChargePoint

Developing a network of intelligent ChargePoint stations around Australia.
